LICENSE TERMS AND CONDITIONS

THE LICENSED SYSTEM

The Licensed System consists of Licensor's patented (US Pat. Nos. 4,972,319 and 5,030,117) processes for the formatting, storage, retrieval and presentation of geographic and geographically related data, Licensor's copyrighted computer program for the use of those processes, and geographic database and graphic compilations. Some of the geographic data supplied is based on USGS topographic and USGS elevation data. All other parts of the System, including the software, documentation (including introductory guide and help screens), the compilations, screen displays and map printouts are protected by US and foreign copyright. DeLorme and 3-D TopoQuads are registered trademarks of DeLorme.

YOUR USE OF THE SYSTEM

General Use. You have the right to install the System on a principal and an auxiliary computer, one of which must be portable, provided the two computers are never in simultaneous use by more than one person. You may use the System as instructed by the documentation to perform its designed functions for the purposes authorized by this license. You may use the function provided by the System to copy the geographic database onto your hard drive for the purposes of improved program performance and use of 3-D TopoQuads in the field. You do not have the right to reproduce any part of the System in any other way, except as authorized below.

Single Computer Use. Use of 3-D TopoQuads on a network or any other arrangement by which its functions are accessible to more than one user at a time is not permitted unless you have obtained a separate multiple seat Data Use License Agreement. (For information on network licensing, please call 207-846-7030 or write DeLorme.)

Reference Use. The System is licensed to provide a topographical map reference for personal, family or household use by consumer licensees or for in-house business or institutional use. The geographic data files may not be used for any purpose requiring exact measurement of distance, direction or elevation, or precision in the depiction of geographic features.

COPY AND INTERACTION RIGHTS AND LIMITATIONS

Projects. You may use the System to create and transfer Project files to other licensed users of 3-D TopoQuads via removable storage media, E-mail, or commercial or private networks, as described in the documentation, provided this is done at no charge and for noncommercial purposes.

Paper Map Printout Rights. You may make and copy an unlimited number of 3-D TopoQuads map printouts for personal or household use, or if you are a business or institution, for in-house purposes, provided that use is limited to the location where the System is installed or to use by employees based at that location.

Special Presentation Rights. You may use map displays and printouts in presentations to an audience present at the place where the presentation is made, if the presentation is not recorded or transmitted electronically to any other location.

Copy Services. You may use a commercial copy service to reproduce paper copies that are authorized by this license.

Interaction with Other Hardware and Software. You may use the System with any GPS receiver recommended by DeLorme, as described in the documentation, subject to the accuracy limitations of GPS signals, as explained in the documentation, and subject to DeLorme's disclaimer of any warranty as to the accuracy of the digital geographic and elevation data recorded on the discs. If your System is furnished with a Handheld tab, you may download routes and maps to compatible handheld computer platforms, as described in the documentation. The System is not intended and is not licensed to you for purposes of steering or guiding a moving vehicle or any navigational use requiring precise position locating.
