

New! Earthmate® GPS LT-40 with Street Atlas USA 2009

Product Descriptions

NEW! New LT-40 model with super high-sensitivity STMicroelectronics GPS chipset

NEW! DeLorme ConstantLock™ technology for superior signal retention even in urban areas and other challenging GPS environments

NEW! Updated street and road detail with updated Street Atlas USA 2009 software included

NEW! NavMode with optional 3-D perspective and larger, more accessible user controls

NEW! Support for UMPCs

150 Words

Turn your laptop PC or UMPC into a powerful GPS navigator, with voice-guided navigation, automatic back-on-track, GPS Radar to locate travel services, and other top-end features. DeLorme's newest USB-powered GPS receiver includes a new super-high-sensitivity chipset, support for ultra mobile personal computers, superior on-screen GPS displays, and updated Street Atlas USA 2009 DVD software included. New STMicroelectronics GPS chipset delivers faster satellite acquisition, and DeLorme ConstantLock™ technology means surefire signal retention even in challenging GPS environments. GPS tracking is easier than ever with NavMode, including optional 3-D perspective and larger, more accessible user controls. Locate over 4 million places of interest (hotels, restaurants, attractions, sports venues, and businesses of all types – most with phone numbers included). Create routes automatically with user controls to ensure you take the roads you want. Calculate fuel usage and costs, and GPS-navigate with total confidence anywhere in the U.S. or Canada, and on major roads in Mexico.
