

Earthmate® PN-Series

Using PN-Series Receivers with Topo USA

Load Maps for use on Your Receiver

Use the provided PN-Series Map DVDs to transfer maps to your receiver or SD card. These DVDs contain the same map data as found in Topo USA, and are **compatible for both PCs and Macs**, and:

- U.S. topography with land cover, rivers and streams, open water, public lands, and more
- U.S. and Canada streets, roads, and places of interest
- Mexico main roads

Use Topo USA DVD software to Plan Your Adventures on Your PC

- Scout the terrain, land cover, and waterways as if you were there
- Discover more than 4 million searchable places of interest—attractions, lodgings, restaurants, and much more
- See campgrounds, boat launch sites, unique natural features, and prime hunting and fishing spots, from DeLorme Atlas & Gazetteer state topographic map books
- View your destination in realistic 3-D, from any compass point
- Automatically create routes on roads and trails – no tracing required
- Easily add boating or kayaking routes, using the available detailed nautical charts
- Insert waypoints, selecting from an extensive library of symbols for hiking, camping, geocaching, fishing, hunting, 4-wheeling, and countless other activities
- Draw tracks
- Add comments to your waypoint and track files
- Quickly transfer your waypoints, tracks, and routes to the PN-40
- Print maps for take-along reference in a variety of scales, including 1:24,000

Download Aerial Imagery, USGS and Canada Topo Quads, and NOAA Nautical Charts from the DeLorme Map Library

- Access the Map Library via the NetLink tab within the Topo USA user interface
- Display downloads both within Topo USA, in full-screen mode or side-by-side with Topo USA maps for comparison and editing
- Using the PN-Series Exchange feature, send downloads to your receiver, or to an inserted SD card
- Low-cost annual subscription entitles you to unlimited downloads
- Certificate for free sample downloads included in package
- **MAC Users:** access the Map Library at data.delorme.com

- When selecting aerial imagery, USGS topo quads, or Canada topos within the Topo USA NetLink tab
- **MAC Users:** connect PN-Series receiver to your computer and transfer Map Library downloads via drag and drop

Update Your Topo USA Maps Files with Collected GPS Data

- Easily transfer collected waypoints and tracks, with comments, to update your maps
- Where applicable, convert collected tracks to routable roads or trails
- Geo-Tag your photos with the precise GPS location where they were taken
