

Map Library Description

Why spend hundreds of dollars on a GPS, and then be limited to just one source for maps?

The DeLorme **Map Library** card provides users of both **Topo USA**[®] software and **Earthmate**[®] **PN-Series** GPS receivers with easy downloads of the following supplemental options:

- **Color Aerial Imagery**
- **USGS 7.5-min. topographic quads**
- **NOAA nautical charts.**

On the PC, all can be viewed within *Topo USA*, either in full-screen mode, or in a split-screen side by side with a *Topo USA* map. The software's draw tools enable users to mark or trace supplemental data features directly onto *Topo USA* maps with precise positional accuracy.

For *PN-Series* GPS users, the imagery, USGS quads, and NOAA charts can easily be uploaded to the receiver. The device automatically "layers" the different options for optimal viewing; users can also turn any or all of them off as situations dictate.

The different types of detail inherent in each of the Map Library options provide a unique ability to prepare for any kind of outdoor activity on the PC, and navigate worry-free with their *PN-Series* GPS.

In the Package

Any customers who purchases at retail or from online resellers will receive an actual card with a unique serial number on it. That serial number will unlock the Map Library for the user.

Map Library Access

The subscription card requires no in-store activation. Users will access the Map Library via the *Topo USA* NetLink tab, found in the software's screen interface. NetLink requires an Internet connection.

Terms:

A Map Library subscription entitles the user to unlimited online downloads during the one-year subscription period. Downloaded maps, charts, and imagery are the user's to keep.

Coverage:

USGS 7.5-min. Topographic Quads – seamless, digitized versions of the authentic 1:24,000 scale topographic maps; available for the entire U.S.

Color Aerial Imagery

- DOQQ* – Entire continental U.S. except as follows: majority coverage for MN, NM, NV, and NY
- USGS High-Resolution City – 133 U.S. cities and their surrounding regions

NOAA Nautical Charts – U.S. Atlantic, Pacific and Gulf coasts; Great Lakes; some major inland harbors (e.g., Philadelphia), and sections of major rivers (e.g., Delaware, Mississippi)

Also available for the continental U.S.: USGS black and white DOQQs, 10-meter color satellite

*Digital orthophoto quarter-quadrangle
