

DELORME

Topo USA[®] 8.0

For the PC Platform

The Most Complete & Best Value Mapping Software for Recreation

Topo USA 8.0 is the most comprehensive computer mapping program for outdoor recreation, with unsurpassed maps, available imagery, trip planning features, on-road navigation, and GPS capabilities.

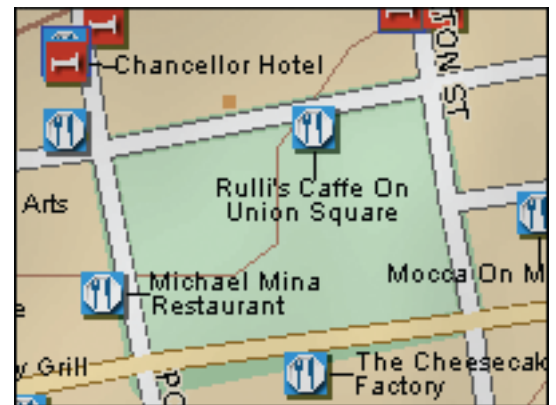

And it's by far the best value for the price – EVERYTHING needed comes in-the-box for the purchase price, including:

- Complete USA topographic maps and detailed streets
- Detailed streets for Canada; major roads for Mexico
- Over 4 million places-of-interest (POIs)
- Extensive USA trails network
- Flexible printing choices
- Ability to share your custom maps over the internet, and more

No Extra Cost for U.S. Topo Maps, Streets & Trails

- The included comprehensive Topo USA maps have updated terrain and hydro data, the latest roads, trails, BLM, National Park, National Forest, and other publically-managed lands, Game Management Districts, and more
- Included with the maps are over 4 million places-of-interest (POIs) from trusted DeLorme products. Now ALL your trip planning information is at hand, from travel to a trailhead, to campgrounds, fishing spots, and provisioning on your way, including:
 - » From Street Atlas USA[®] attractions, lodgings, restaurants, stores, post offices, much more
 - » From the Atlas & Gazetteer[™] series boat ramps, campgrounds, fishing and hunting spots, unique natural features

Introducing New Travel Features

- Voice navigation comes to Topo USA! Long available in Street Atlas USA.
- NEW! NavMode for driver-view convenience during real-time navigation using a laptop PC. Puts all the most-needed controls and information at your fingertips. Full-screen view displays in 2-D or 3-D
- GPS Radar lets you find Points-of-Interest near your current location. Easily search for points of interest including gas stations, restaurants, accommodations, rest areas – all near your current location or near the center of the map. If speech is enabled, listen to the nearest search result
- UMPC Mode – Topo USA can now be optimized for display on Ultra-Mobile PCs and other small screens
- More that 200,000 added travel points-of-interest (POIs). Includes boat ramps, campgrounds, fishing and hunting spots, unique natural features from the DeLorme Atlas & Gazetteer[™] series, as well as traditional travel info like restaurants, lodging and campgrounds

DELORME

Topo USA[®] 8.0

For the PC Platform

Amazing 3-D Flyovers

- 3-D mapping quickly renders lifelike views of your favorite terrain
- Soar above rivers and lakes, ascend mountains, and explore new places – all from your computer

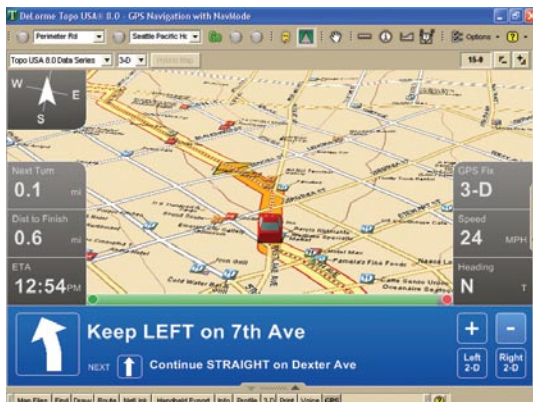

Geo-Tag Your Digital Photos

- Preserve a record of exactly where you took your digital photos – all you need is a GPS track
- Enlargeable thumbnails appear on your maps

Unrivaled GPS Capabilities

- New in-vehicle navigation features include NavMode for a hands-free full-screen view while tracking or traveling a route with a GPS receiver, GPS Radar to find POIs nearest your current location, and spoken direction and voice commands

What's New in Version 8.0

Updates

- » Over 300,000 new or updated U.S. streets
- » Thousands of new trails
- » Detailed streets and roads for Canada
- » Main roads for Mexico
- » More than 200,000 ADDITIONAL POIs (places-of-interest)

New In-Vehicle Navigation & Travel Features

- » GPS Radar—find points of interest near your current location
- » 2-D or 3-D NavMode for hands-free full-screen view while navigating in your vehicle
- » UMPC mode—optimizes your screen for ultra-mobile PCs and small screens
- » Spoken directions and voice commands
- » Plan Trip option — estimate end-of-day breaks, fuel stops, and fuel cost

Advanced Geocaching Features

- » If you own or purchase a PN-Series Handheld GPS, you can take advantage of several new features:
- » Import Geocaching.com pocket queries using Cache Register (coming soon)
- » Send-to-GPS now available for Delorme PN-Series handhelds
- » See cache descriptions in full, with other cachers' log notes
- » Geocaching symbols added to the PN-Series symbol set support new geocaching features on PN-Series devices
- » Drag cursor to multi-select caches from Topo USA and send them directly to your GPS
- » Cache names on maps are hyperlinked to their Geocaching.com pages
