

DELORME

Lead. Don't Follow.

A Breakthrough in Satellite Messaging

The DeLorme inReach™

Assured 2-way communication, anywhere in the world

The inReach keeps you connected, sending and receiving vital information in all the places where cell phones and one-way satellite messengers can't.

By itself, it's a multi-purpose GPS communicator

- o Send up to three pre-loaded messages for anticipated situations
- o Designate delivery to email, cell phones, Facebook, or Twitter
- o In an emergency, send an SOS with your GPS location embedded
- o Receive delivery confirmation for all messages via LED
- o Let others track your progress online for mutual peace of mind

It also pairs with Android smartphones and DeLorme GPS for full-featured text messaging

- o Compose messages up to 160 characters on phone or GPS
- o Receive return messages on your phone or GPS, from cell phones, email addresses, or other inReach users
- o Send SOS messages describing your emergency to improve responders' preparedness
- o Dramatically improve GPS accuracy without draining phone battery (Android users)

Iridium Connected

Iridium is the premier satellite communication provider with two-way communication and 100% global coverage that other providers can't match.

Available October 2011.

Separate models for Android OS (above) and DeLorme GPS

MSRP for each: \$249.95

Send your messages and location to:
